

A Complete Identification Solution

ON-SLIDE AND DIRECT-TO-CASSETTE PRINTING

WITH FULLY INTEGRATED PTLab™ SOFTWARE

The Next Generation
of Signature Printers

The NEW Signature EVO Slide and Cassette Printers from Primera with integrated PTLab software can significantly increase your lab's efficiency while helping to avoid the risk of specimen misidentification.

Features & Benefits

for Signature EVO Slide and Cassette Printing Solutions:

- On-demand, black or color printing
- Prints directly on slides or cassettes – eliminates handwriting or difficult-to-apply labels
- Chemical-resistant print – ensures reliable identification of slides or cassettes
- PTLab™ Software – included software ensures that the exact information you require gets printed every time; optional Pro version allows configurable input/output data streams to the LIS systems
- Small footprint – slide printer and manual cassette printer fit perfectly at the workstation
- Reduce inventory and purchasing activity – your inventory of multiple slide colors and cassettes can be eliminated, since you can now print colors
- Thermal-transfer printing at razor-sharp 300 dpi
- On-demand or batch mode printing
- Ethernet or USB interface – ability to integrate with Laboratory Information Systems

SIGNATURE EVO SLIDE PRINTER

- Patented air-puff system for perfectly fed slides, every time (EVO SlideSeparator™)
- 100 slides are stored in easy-to-load cartridges – away from dust and other potential contaminants
- LCD screen for status and user feedback
- Up to 10 slides printed per minute

SIGNATURE EVO CASSETTE PRINTER

- Upgraded cassette picking system
- 4 cassette hoppers (40 cassettes per hopper)
- Prints with standard cassettes with 35 to 45 degree angles with either lid on or lid off, no adjustments needed
- Two options available: as a stand-alone, manual printer or as a fully automated, complete system
